

FTSE/ATHEX-CSE BANKING INDEX

The FTSE/ATHEX-CSE Banking Index is designed to capture the performance of banks listed on the Athens and Cyprus stock exchanges. The index has been designed to form the basis for financial products that would allow investors to trade the banking sector in a single transaction.

FEATURES

- Stocks are free-float weighted to ensure that only the opportunity set is included within the index
- Stocks are liquidity screened to ensure that the index is tradable
- The index is suitable for the creation of financial products, such as index funds, warrants, certificates, derivatives and Exchange Traded Funds (ETFs)
- The index series is calculated in accordance with the Industry Classification Benchmark (ICB), a global standard developed in partnership between FTSE Group and Dow Jones Indexes
- The indices are managed according to a transparent and public set of index rules, and overseen by an independent committee of leading market professionals. The committee ensures that the rules are correctly applied and adhered to. Regular index reviews are conducted to ensure that a continuous and accurate representation of the market is maintained
