

FTSE BURSA MALAYSIA PALM OIL PLANTATION INDEX

The FTSE Bursa Malaysia Palm Oil Plantation Index has been designed to provide easy access to investors who wish to participate in Malaysia's burgeoning palm oil industry. This benchmark index comprises palm oil related companies from the underlying FTSE Bursa Malaysia EMAS Index and aims to capture the performance of companies that earn a substantial proportion of their revenue from palm oil activities. Palm oil activities include production, ownership or operation of palm oil and palm oil plantations.

Screening Highlights:

- Eligible constituents must be a member of the FTSE Bursa Malaysia EMAS Index at the semi-annual review
- To be included in the index a company is required to have greater than 30% of total revenue from palm oil related activities
- Existing constituents will no longer be eligible if total revenue from palm oil related activities falls below 20%

FEATURES

- The index has been designed for use as a performance benchmark
- Together with the FTSE Bursa Malaysia Asian Palm Oil Plantation Index, this index forms part of the FTSE Bursa Malaysia Index Series
- Stocks are capped at 10% on a quarterly basis to avoid over-concentration of any one stock
- Free float screening is in-line with the FTSE Bursa Malaysia Index Series to ensure that only the investable opportunity set is included within the index
- Liquidity screening is based on the methodology used in the FTSE Bursa Malaysia Index Series
- Deletions may occur intra-review where companies are either delisted, subject to take over, or cease to be an eligible constituent
- Capital and total return indices are available
