SEDOL Codes

SEDOL codes are presented in straight number format with leading zeros. For example, the SEDOL code 0-001-241 will be presented in the FTSE data feeds as "0001241".

FTSE Global Equity Index Constituent Identifiers

FTSE Global Equity Index Series (e.g. FTSE All-World, FTSE World, Multinationals and Global Style) data feeds use codes to identify constituents. The identifiers are in the format:

"Cdddd" where dddd is a unique number that never changes. Codes may be 6, 7 or more characters in length.

i.e. "C20185" represents AUSTRIAN AIRLINES SCH100

A SEDOL number is included as the second field, which can also be used as an identifier. However, it must be noted that SEDOLS can change for individual stocks. Note that a SEDOL license is required.

CUSIP Codes

CUSIP codes are presented in straight number format with leading zeros, if applicable. For example, the CUSIP code 594918104 will be presented in the FTSE data feeds as "594918104".

where,

---- is the four digit Industry Benchmark Classification (ICB) code (see pages 26-28)

when sub-sectors are calculated, sectors are also available.

Examples: FTSE Asia Pacific ex Japan Banks Index is "AWPACXJA8000" (Industry)
